

Like a flight simulator for science, Late Nite Labs recreates a traditional lab environment accessed right from your computer.

Used by universities and colleges for on-campus and online programs, our labs let students explore in a safe, interactive environment anytime, anywhere. Each experiment module comes equipped with all the instruments materials, and texts for each course—all for less than the price of a textbook—so that you can provide sophisticated learning experiences while preserving resources. And with everything accessed right from a browser, students and educators can work based on their own schedules.

Features

Assessment

Every lab comes with its own assignment and answer key, which you're free to edit to tailor to your course. And our gradebook allows you to assess and manage student progress all in one place.

Course Management

With your free teacher account, you can custom-design as many courses and sections as you need. If you teach the same labs each semester, it's easy to re-use them instead of recreating the wheel.

Lab Builder

Customize labs or create new ones from scratch using an unlimited supply of glassware, materials, and lab equipment.

Tech Support

Our dedicated tech support team can field all of your students' questions so you can focus on your course.

Unlimited Access

No matter what subject you teach, you can pull labs from any subject area to give students a more diverse experience. Assign 100 if you'd like!

Step Up to the Bench

Conduct experiments with state of the art instruments.

Use all the chemicals, compounds, and specimens you'd find in a wet Lab. No goggles needed.

Throw out materials when you're done. Grab new ones when you need them.

Upload photos, videos, and files with the media player.

Keep track of progress with the Lab Log and Timer.

Lab manual includes background, procedures, and a note-taking section.

Applications

On-campus

Use LNL as the full lab component to your course. With the ability to accommodate any class size, lab space and scheduling will never be a problem, and students and faculty can work at the times most convenient to them.

Online

Offer labs to distance learners no matter where they live. Since LNL is launched right from a browser, off-campus students gain access to a state-of-the-art labs right from their computers.

Hybrid

Blend your existing wet labs with any number of our online labs. By giving students access to normally dangerous or expensive experiments, your lab offering can match your unique curriculum in a safe and budget-friendly way.

Pre-lab

Assign LNL before wet labs to get students acquainted with concepts and procedures. By practicing online first, they'll have a deeper understanding and appreciation of the science unfolding in front of their eyes.
