MyAcademicWorkshop™
Connect. Engage. Learn.

www.link-systems.com

Don't Have Content? Don't Worry!

MyAcademicWorkshop is pre-populated with seven mathematics syllabi (High School Algebra 1, High School Algebra 2, High School Geometry, Basic College Mathematics, Algebra, Trigonometry, and Pre-Calculus) containing thousands of algorithmic questions created by Link-Systems International's subject matter experts. Each syllabus is broken into assignments that can be used as is or customized via the integrated WorldWideTestbank workflow editor and authoring interface.

Focus on Learning Objective Mastery

MyAcademicWorkshop is a textbook independent program, thereby reducing costs, while maximizing its flexibility of use. We focus on learning objective mastery through direct student input and therefore refrain from multiple-choice and T/F questions whenever possible. Students can work through thousands of problems in each learning objective, on their own, with a hint if needed, or even see the problem worked through step-by-step. With our latest feature, additional support is only a click away; with direct access to NetTutor--

Link-Systems International's 24/7/365 service-- students can access a live session or a Q&A center regardless of whether your institution is a NetTutor client.

Proven Success

Student Testimonials

"I like the fact that the program gives you 3 chances and shows you how to do the problem. I also like that you can do another problem of the same kind. I have never made grades of 100 percent on homework for math and this helped me to do that and prepared me for the test that I get B's on two of them, I've only made C's on so I really like this program because it helps me to see where I make mistakes."

"I like this program because it shows you how to do it and gives you the opportunity to try again if you missed it and you're able to see what you done wrong."

"It is very good because if you don't know how to do a problem then it will show you step by step and then you can go through it and do it step by step."

Stable, Scalable, Familiar Access

MyAcademicWorkshop provides direct access via single sign-on (SSO) for all major learning management systems (Blackboard, Angel, Moodle, Desire2Learn, and Sakai). Utilizing Basic LTI, custom SSO integration is also available. Because MyAcademicWorkshop was built with ease-of-use in mind and based on the typical learning management system experience of today's student, faculty, and administrators, the only challenge in using MyAcademicWorkshop is learning the content and passing the assignments.
